## **EXAMINER'S AMENDMENT**

### **Faxing of Responses to Office Actions**

In order to reduce pendency and avoid potential delays, TC 3700 is encouraging FAXing or responses to Office Actions directly into the Group at (571) 273-8300. This practice may be used for filing papers, which require a fee by applicants who authorize charges to a PTO deposit account. Please identify the examiner and art unit at the top of your cover sheet. Papers submitted via FAX into TC 3700 will be promptly forwarded to the examiner.

1. Claims 10-12, 24, 30, and 31 have been amended for further examination. Claims 1, 2, 5, 7, 15-23 have been canceled.

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claims:

- a. On Claim 10, line 5, please insert -- primary—before “film layer having”, please delete “primal”.

*Allowable Subject Matter*

3. Claims 3, 4, 6, 8-14, 24-38 are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter: No prior art of record discloses or fairly suggests a form with an integrated card comprising: a base paper layer having top and bottom surfaces and a periphery; a primal film layer having top and bottom surfaces and a periphery; a breakaway layer coated on top of the primary and within the periphery of the primary film layer; an adhesive layer to secure the bottom surface of the base paper layer to the breakaway layer; at least one die-cut through the top and bottom surfaces within the periphery of the base paper layer, through the adhesive layer and through the breakaway layer; wherein the area within the die-cut forms an information card; wherein the breakaway layer comprises a single layer of dry release material that has a greater affinity for the adhesive layer than the top surface of the primary film layer, and further having release levels with respect to the primary film layer that vary in a predetermined pattern at least within the periphery of the die cut; and including all of the other limitations of the independent claims.

The Matsuguchi reference was the closest reference similar to applicant's invention. However, Matsuguchi does not disclose wherein the breakaway layer comprises a single layer of dry release material and has release levels with respect to the primary film layer that vary in a predetermined pattern at least within the periphery of the die cut.

***Prior Art***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Garrison, Moeller et al, Washburn et al, Dronzek Jr. et al, Dronzek Jr. et al ('781), Challoner et al, Casagrande, Mijdam et al, Cross, Braun, and Nandy et al disclose similar forms with integrated cards.

**Contact Information**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark T. Henderson whose telephone number is (571) 272-4477, and informal fax number is (571) 273-4477. The examiner can be reached on Monday-Friday from 9:00AM to 3:45PM.
